

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of hands-on experience across the full development lifecycle, combining full-stack engineering (ReactJS, Spring Boot, Java) with automation, SQL Server data validation, and CI/CD pipeline expertise. Built automation tooling and Python/PowerShell scripts that reduced manual engineering effort by ~40%, integrating with Jenkins and GitLab pipelines. Collaborates with engineers, architects, and business analysts in Agile teams to design, build, test, and deploy reliable, scalable software. ISTQB Certified Foundation Level.

CORE COMPETENCIES

ReactJS & Full-Stack Development

SQL Server & Database Engineering

Software Design & Architecture

Automation & Scripting (Python, PowerShell)

CI/CD Pipeline Integration (Jenkins, GitLab)

REST & SOAP API Development

Agile SDLC

Requirements Analysis

Scalability & Performance Optimisation

Stakeholder Collaboration & Mentoring

PROFESSIONAL EXPERIENCE

IBM — Quality Assurance Engineer (Lead Responsibilities)

Feb 2024 – Present

- Collaborated within feature teams across the full SDLC — requirements analysis, design, coding, testing, deployment, and operations — for multiple enterprise and SaaS platforms.
- Built and maintained automation frameworks (Selenium, Java) integrated into Jenkins & GitLab CI/CD pipelines, improving release velocity and reducing manual engineering effort by ~40%.
- Designed and developed REST and SOAP service validation tooling using Karate, verifying API contracts and integration stability across distributed microservices.
- Automated operational workflows using Python and PowerShell — environment provisioning, deployment validation, result aggregation — applying best practices around scalability and automation.
- Executed advanced SQL Server & MySQL queries for backend data validation, performance tuning, and root-cause analysis across enterprise applications.
- Partnered with developers, architects, and BAs in design reviews and Agile ceremonies; mentored junior engineers on automation best practices and Agile delivery.

Java Selenium Karate Python PowerShell Jenkins GitLab SQL Server MySQL Jira Microservices

Engati Technologies — Software Developer Intern

Jan 2023 – Sep 2023

- Built full-stack features using ReactJS (front end) and Spring Boot/Java (back end) for an enterprise chatbot platform across the full application development lifecycle.
- Developed and unit-tested RESTful web services with JUnit; integrated and validated third-party APIs (Facebook, WhatsApp, Instagram, Slack), verifying data flows and error-handling logic.
- Worked within Jenkins CI/CD pipelines for build validation and code quality analysis; used SQL and MongoDB for data modelling and backend performance tuning.
- Participated in Agile code reviews and sprint ceremonies, shipping production-ready features with maintained test coverage.

ReactJS Spring Boot Java JUnit REST API MongoDB SQL Jenkins

KEY PROJECTS

E-Commerce Microservices Platform

Designed event-driven microservices scenarios, validating Kafka message flows and Apache Solr search across distributed services.

Java Spring Boot Apache Kafka Apache Solr ReactJS

CI/CD Automation Framework

Selenium + Java automation frameworks integrated into Jenkins & GitLab pipelines, cutting manual QA effort by ~40% across SaaS platforms.

Java Selenium Jenkins GitLab Python

Duplicate Question Detection — NLP/ML

Built data-driven evaluation pipelines to validate ML model output accuracy for duplicate question detection using NLP techniques.

Python NLP Machine Learning Scikit-learn

API Validation Tooling (Karate)

REST and SOAP service validation tooling verifying API contracts and integration stability across distributed microservices architectures.

Karate REST API SOAP Java Microservices

TECHNICAL SKILLS

Languages Java, Python, JavaScript, TypeScript, SQL, XML/XPath, XQuery, PowerShell

Databases MS SQL Server, MySQL, MongoDB, Redis, Elasticsearch

Testing & Automation Selenium, Karate, JUnit, RPA

Tools & BI Jira, Confluence, Kibana, Power BI, VS Code, Microsoft 365

Frameworks & Frontend ReactJS, Spring Boot, HTML/CSS

APIs & Integration REST API, SOAP API, Apache Kafka, Service Integration

CI/CD & DevOps Jenkins, GitLab, Git, Docker (exposure)

Cloud IBM Cloud, Microsoft Azure (AZ-900)

CERTIFICATIONS

ISTQB Certified Tester – Foundation Level (CTFL)

ISTQB International

IBM Cloud Advocate V2

IBM

Microsoft Certified: Azure Data Fundamentals

Microsoft (AZ-900)

EDUCATION

B.Tech — Computer Science (AI & ML Specialisation)

SRM University, Chennai · June 2019 – May 2023
